27/10/2021 13:43	Rachel Hartill	Issues so far with todays Emergency timetable:	
		1S52 10:30 London Euston-Glasgow Central departed Euston 15 late due to no Train Manager assigned to work train due to also being 1Z52 running from Preston	
		Services from Glasgow to Preston allowance for speed restrictions is between last 3 Signals before Lockerbie	
		Services from Preston to Glasgow allowances for speed restrictions is from last junction before Glasgow ie1Z51 arrived at Bridge Street Junction running 34 late but arrived into Glasgow 21 early.	
		Issues with 1Z20 Driver being incorrectly routed, Network Rail described train as 9M52	
		Shuttle services from GLC-EDB not showing route service on TRUST	
27/10/2021 16:19	Dave Leng	Several requests from Train Managers & Preston Station team for the xx17 departures 9Mxx to be held to connect out of 1Mxx services from Glasgow due to arrive at xx13hrs.	
		Holds of up to 5 minutes agreed but some requests were for longer but these were declined as would defeat the object of splitting the train service at Preston to keep it right time from Preston south bound.
